

## sage Enterprise Intelligence

### **1,000 SEI Customers! Thank you, Sage and Partners!**

Tangerine Software recently received its 1,000<sup>th</sup> customer order from Sage for Sage Enterprise Intelligence (SEI). *“This is a remarkable achievement after only three years of collaborating with Sage to bring SEI to the global market,”* states Greg Brown, President of Tangerine Software.

SEI was first made available for the 'Sage X3' ERP solution in North America, where today, more than 70% of X3 customers are benefiting from SEI's comprehensive, user-friendly analysis and reporting capabilities. SEI is also available, and fully integrated, with nine other Sage business solutions. *“A proof statement of just how powerful, yet scalable, SEI really is,”* confirms Greg.

Sage customers such as BGR Packaging in West Chester, Ohio wish they had SEI a long time ago. *“Before Sage Enterprise Intelligence, we struggled and wasted a lot of time and money trying to access information and make sense of important company data stored across several different databases,”* said Barry Gertner, Director of Information Systems and Technology. *“Now with SEI, we've managed to standardize corporate analysis and reporting on a single solution, which has cut costs and increased efficiencies significantly. Its seamless integration with Sage X3 makes it easy for everyone to access the information they need to do their jobs and collaborate with others. I wish we had SEI available to us years ago.”*

Sage partners, including SynergERP in South Africa, are selling more Sage business software and increasing customer satisfaction because of SEI's value-added functionalities. *“Our customers love the fact that Sage Enterprise Intelligence is comprehensive, simple to use, very powerful, and scalable. It's great that we can deploy Sage Enterprise Intelligence in the Cloud or On Premise. What really makes the difference is the great relationship with the software's author, Tangerine Software, and how they work with us to ensure our clients get real value,”* states Mr. Ashley Regenass, CEO at SynergERP (Pty) Ltd.

SEI is commercially available through Sage and business partners for the following Sage business software solutions: Sage X3, Sage 100, Sage 300, Sage 500, Sage 1000, Sage 200C, Sage CRM, Sage X3 People, and Sage XRT.

For information on Sage Enterprise Intelligence (SEI), or to schedule a product demonstration, please contact Sage or your Sage business partner.
