

Press Release

Tangerine receives special recognition at Sage Africa conference

Tangerine Software had the pleasure of attending Sage Insights 2015, held February 5th to 8th at the beautiful Champagne Sports Resort, located four hours south of Johannesburg. The four day Sage Africa partner conference included several insightful and interactive sessions on Sage core and value-add solutions, including Sage Enterprise Intelligence, Tangerine's native Nectari Business Intelligence product.

At the awards ceremony, Tangerine Software was pleased to win "International Developer of the Year", recognition in part, for SEI's tremendous success in Africa and the Middle East. "Receiving this special award reflects on the amazing success of SEI globally" states Greg Brown, President of Tangerine Software. "Sage and its global partner community are fast making SEI their BI solution of choice, and the tremendous sales results prove it", says Mr. Brown.

Sage Insights is an annual partner conference that is hosted by Sage Africa every February. This year's attendees from Tangerine Software included Guy Girouard, SEI / Nectari Product Manager, Olivia Brown, Global SEI Account Manager and Greg Brown, President.

About Tangerine Software:

Established in 1992, Tangerine Software is a provider world class enterprise software solutions, including Sage ERP X3, Sage's global ERP solution for the mid-market. Tangerine is also the author of Nectari Business Intelligence, an innovative and easy to use BI offering for any size of company. In 2013, Tangerine and Sage signed a global agreement, providing Sage exclusive rights to distribute Nectari under the Sage brand name of Sage Enterprise Intelligence (SEI). Currently, SEI is available for a number of Sage's ERP solutions, including Sage 300, Sage 500 and Sage ERP X3.
