

Sage X3 Construction

A modern enterprise construction management solution Built from the ground up for the construction industry

Sage X3 Construction enables midsize and larger domestic and international construction companies to meet the industry-specific challenges they face in an increasingly complex, global marketplace.

A faster, simpler, more flexible construction management solution

Sage X3 Construction runs every aspect of your construction business faster, more simply, and far more flexibly than ever before. Leveraging a history of over 30 years in delivering business applications for the engineering and construction space, this new solution from Sage offers you a completely new, modern, and mobile enterprise applications suite built from the ground up to address the complexity and risks faced by today's mid-tier to larger construction firms.

A foundation of success

Sage X3 Construction delivers a data-driven, unified experience built on the proven Sage X3 platform, which is used by over 5,000 customers worldwide. This industry solution offers core capabilities for complete construction lifecycle management, including: Project Management, Contract & Sub-Contract Management, Estimating, Project Financial and Cash Flow Management, Project Document Management, Timesheet Support, and Project Visualization & Analytics. Sage X3 Construction also integrates with Sage's HR, Payroll and CRM products, and other third-party applications like Oracle Primavera and Microsoft Project.

Global scalability

Sage X3 Construction is easily scalable, so you'll never run out of capacity again, and it quickly adapts to your changing needs, driving efficiency and helping you manage costs and quality so you can complete profitable projects on time and within budget. It's also

optimized for multi-site, multi-country, multi-entity construction – with all your project and financial data, reporting, compliance, and processes rolling up into one system.

Key benefits for your construction enterprise:

Get more done, faster

Increase user productivity and accelerate adoption with an intuitive web interface – easily personalized to work the way your users work – driving efficiency to save time, and increase project profitability.

Go where your jobs take you

Access key project data on mobile devices – untether field teams and manage costs and project statuses, approve purchases, and view key performance indicators from any device.

Keep the focus on your projects

Simplify IT management while leveraging enterprise-class business management functionality, security, and scalability – all at a fraction of the cost and complexity of typical ERP systems.

Actionable insight

Evaluate and monitor projects, and make better on-site decisions with real-time project data and self-service dashboards and KPIs, business intelligence, and reporting tools.

Build on a single, strong foundation

Reduce costs and complexity with a single, integrated solution encompassing all critical construction enterprise processes.
