Sage X3 for
CONSTRUCTION

sage X3 for the Construction Industry

Major concerns in the construction industry include risks to growth and expansion of the industry, industrial unrest, loss of key skills and expertise, health, safety and environmental sustainability, project execution, tender risks, credit risk management and compliance with the laws and regulations, such as the recently introduced 'withholding tax on service fees. Construction companies engaging in Projects throughout Africa need to be fully aware of the application and implications of the new withholding tax, to ensure accurate cash flow planning and project pricing.

Technology is redefining business as we know it. Across every industry and market segment, the ever increasing pace of technological change is forcing companies to become more agile or they will likely fall behind and become obsolete. The question that is facing every company today is not a question of being able to afford the cost of change but rather, "What will the cost be of not changing?"

With Sage X3 Construction, you are choosing the next generation of business management solutions for the Construction sector. It's become clear that smart companies need to adopt new technology processes to transform Construction operations, to be successful now AND in the years to come. Sage X3 Construction will help you stay agile and meet whatever demands come your way.

Sage X3 Construction runs your business faster than ever before, with a cohesive, enterprise-class solution to manage all of your core business processes—from financials, purchasing, budget and cost management right through to pricing and planning a project, site level control and finally, the completion certificate. It accelerates collaboration and reporting and delivers real-time insight into all costs and operational performance. Sage X3 Construction is ready for you. Built-in functionality for best practice financial management combined with the ability to accommodate any of your unique rules and processes. It's also easily scalable—so you'll never run out of capacity again — quickly adapts to your changing needs, driving efficiency and helping you manage costs whilst ensuring services are delivered on time and on budget.

Running your business doesn't have to be complicated

Get more done, faster.

Increase user productivity and accelerate adoption with an intuitive web user interface that users can easily personalize to work the way they do, driving efficiency and eliminating administrative overheads.

Go where your business takes you.

Access your data on mobile devices, manage costs and project statuses, approve purchases and view key performance indicators on the go on any device. Sage X3 Construction includes a complete mobile framework to deploy specific applications to your workforce on site or in the office.

Take back control over your processes.

Eliminate inefficiencies, ensure compliance and streamline operations with end-to-end integration of your business processes to control costs and improve profits and controls.

Get the insight you need, when you need it.

Evaluate risks and monitor performance in real-time with user dashboards, self-service business intelligence and reporting tools - delivered on premise, on mobile or in the cloud.

Gain agility and focus on your business.

Take advantage of enterprise-class business management functionality, security and scalability at a fraction of the cost and complexity of typical ERP systems. Simplify IT management and free up resources to focus on more important projects. Embrace the power of Sage X3 Construction to easily manage unpredictable new requirements and change, whilst delivering the desired level of quality and service.

One system, anywhere at anytime.

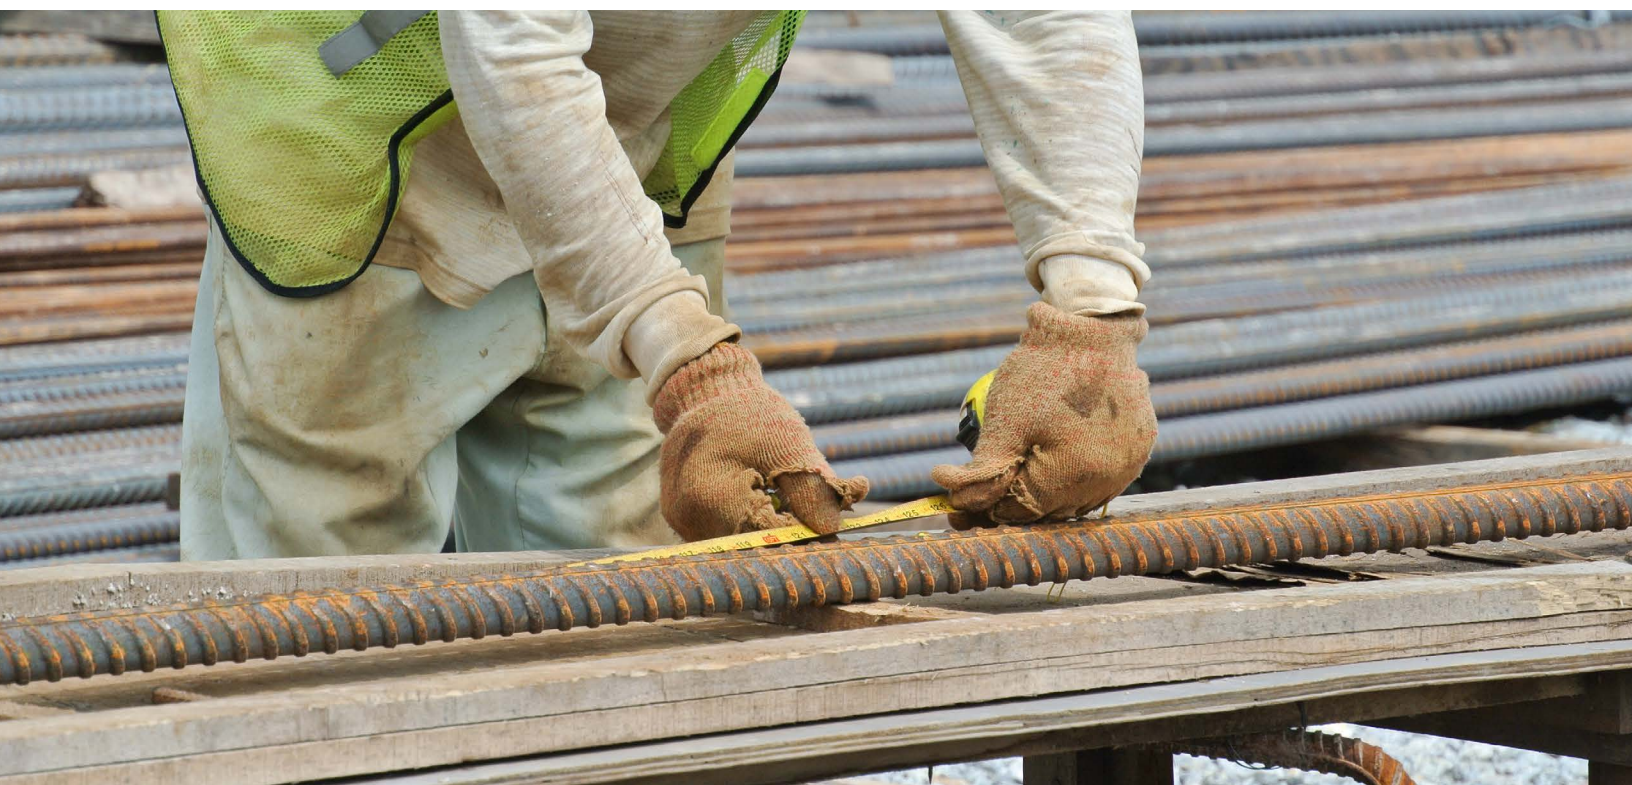

Reduce costs by implementing a single system for your engineering needs. Replace legacy systems that inhibit performance through duplicate processing, weak integrations and an over-reliance on spreadsheets to make decisions.

Integration made easy.

Over time, many Construction organizations have invested heavily in specific best-of-breed software solutions that are still required or that are needed as part of the transition phase to a new business management solution. Sage X3 Construction delivers many integration possibilities whether batch or real-time using web services or java based technology.
